

# $H\alpha$ emitters from the Southern Photometric Local Universe Survey (S-PLUS)

---

Luis A. Gutiérrez Soto, R. Lopes de Oliveira  
Stavros Akras, Denise R. Gonçalves, C. Mendes  
de Oliveira & S-PLUS collaboration

16th S-PLUS Meeting  
December, 2021

## Low surface brightness galaxy

---

### Kron radius vs Mu max

There is a high density regions in the plots

# HDBSCAN

Unsupervised/clustering machine learning.

- Input data: Mu Max, Kron Radius and r\_auto mag

# HDBSCAN

## Unsupervised/clustering machine learning

Group 6:  $\sim 80 \times 10^3$  objects

# Principal Component Analysis

Variables: "Mu max", "kron radius", "J0410", 'J0430', "g", "J0515", "r", "J0660", "i", "J0861" and "z"

# Principal Component Analysis

# COLOUR CRITERIA

## S-PLUS colour-colour diagrams

We first produce several colour-colour diagrams...

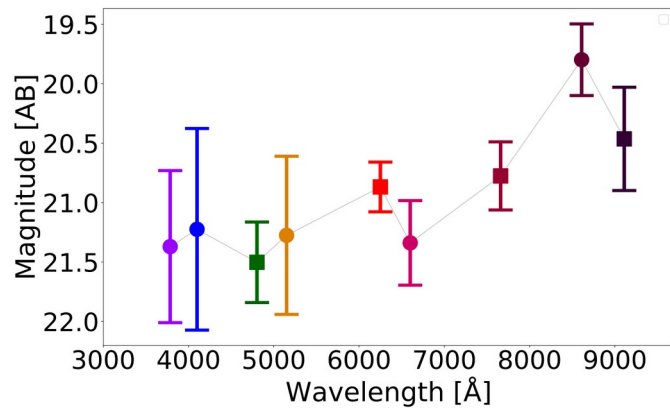

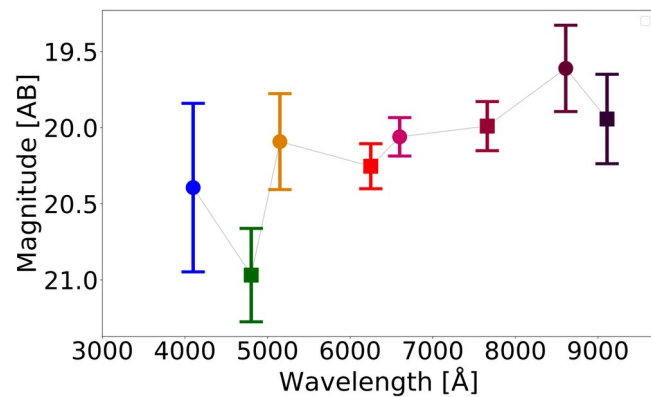

## S-PLUS colour-colour diagrams

$(r - z)$  vs  $(g - r)$  color-color diagram with the HDBSCAN results -- Group 6

# RESULTS

I think that they are good candidates

# RESULTS

I think that they are good candidates
